

Positive Energy H2O

The way water was meant to be!

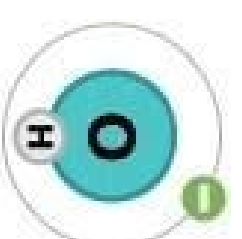

Himalayan quality water for your health!

Positive Energy H2O

The way water was meant to be!

Himalayan quality water for your health!

Technical Parameter	
Product Name	Alkaline Water Ionizer
Model	PE-1A (9plates Titanium with platinum coating)
Power Supply	AC 120 V (also AC 220-240V), 60 Hz
Water Pressure	0.7-5kgf/cm ³
Water Flow	1.6 to 3 L/min
Product Dimension	H330mm × W280mm × D155mm
PH Range	3 to 11.2
ORP	600mV to -700mV
Box Dimension	48cm × 30cm × 34cm
Carton Dimension	52cm × 35cm × 37cm
Gross weight	10.5KG

Product Description

1. Uses whole acrylic touch panel which operates like iPhone or iPad
2. A super large 4.2-inch LCD colorful screen, the LCD displays ORP, PH, Flow rate, Temperature and process of water.
3. The microcomputer automatic control system for the electrolysis suitable for the water TDS from 50 to 1500PPM.
4. This ionizer has multi choices for different customers usage: Nine super large titanium-platinum coated plates which increases usage life. System also has self-cleaning function. (Plates size: 9*2*12.5cm)
5. PH levels are from 3 to 11.2 and ORP level from +600mv to -700mv.
6. Uses high-power SMPS power supply, the system has a built-in overheating radiator and continuous work function.
7. There is water controller on the machine, you don't need to control water from the tap, sometimes, someone's water faucet is under the sink, it is very hard to turn off the water.
8. Includes changeable power cord for different power plug from different countries.
9. Has built-in fiber active carbon filter to bid farewell to an external filter system, installing the water ionizer is simple and convenient.

Ionized Alkaline water produced by our Positive Energy

Water Ionizer has many of the same "giving qualities" as

water obtained from a free flowing, fresh water

Himalayan mountain spring. A mountain stream or

spring create water that has been naturally purified,

oxygenated and mineralized by passing over the rocks in

the stream bed and through the rock strata.

This flowing water causes small clusters of 5-6 molecules

or "Nano clusters" to form.

All the minerals in the Himalayan rock strata and stream

bed naturally causes to water to be alkaline and to have a

Negative Oxidation Potential or ORP which gives the water

the ability to neutralize free radicals in the body when you

drink it.

The Our Positive Energy Water Ionizer can transform

ordinary tap water into water with the same characteristics

as water obtained from a free-flowing Himalayan mountain

spring.

- Purified by superior filtration
- High levels of oxygen from the ionizer process
- Alkalinity through concentration of minerals
- Antioxidant capability neutralize free radicals
- Nano-clusters for more effective tissue hydration

The common alkaline minerals concentrated by the water

ionizer to produce alkaline water are: calcium,

magnesium, sodium and potassium and iron. The acid

minerals that are discarded include Nitrate, Chloride,

Sulfate and carbonate, plus other potential harmful

substances found in the water.

The common alkaline minerals concentrated by the water

ionizer to produce alkaline water are: calcium,

magnesium, sodium and potassium and iron. The acid

minerals that are discarded include Nitrate, Chloride,

Sulfate and carbonate, plus other potential harmful

substances found in the water.

Heating Unit

No Chlorine or Fluoride.

Why drink Positive Energy alkaline ionized water?

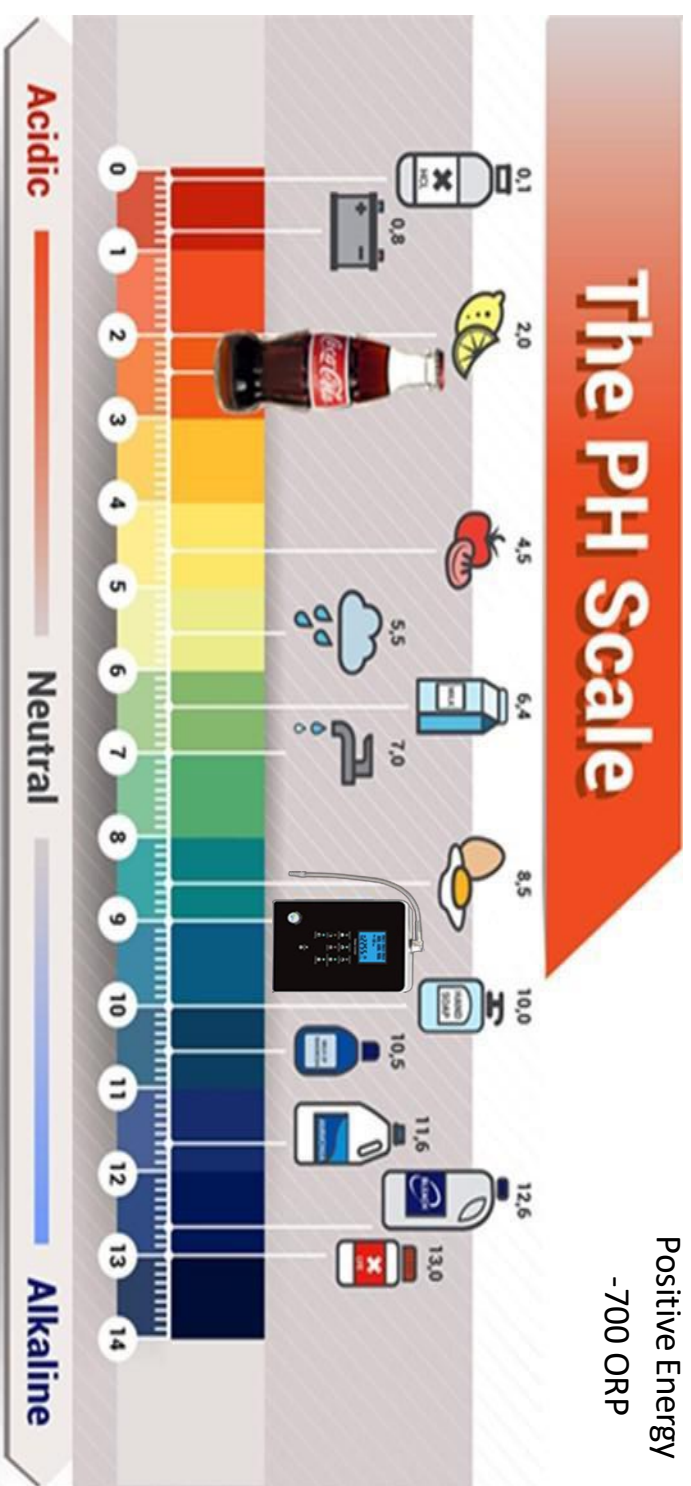

When Henri Coanda, Nobel winner in fluid dynamics, lived with the Hunza people he discovered the qualities of Himalayan water, was one of the major reasons for their longevity. He later became the first to separate water into an alkaline and acidic condition. He realized this was the way water was meant to be, alkaline and beneficial for healing and longevity.

Are you are concerned about or have someone who suffers from the top 80% cause of diseases and death due to free-radical damage and acidic interstitial fluids? We invite you contact us to learn about the benefits of how an Positive Energy H2O Water Ionizer can address these issues, deliver small clustered water, and improve your overall health.

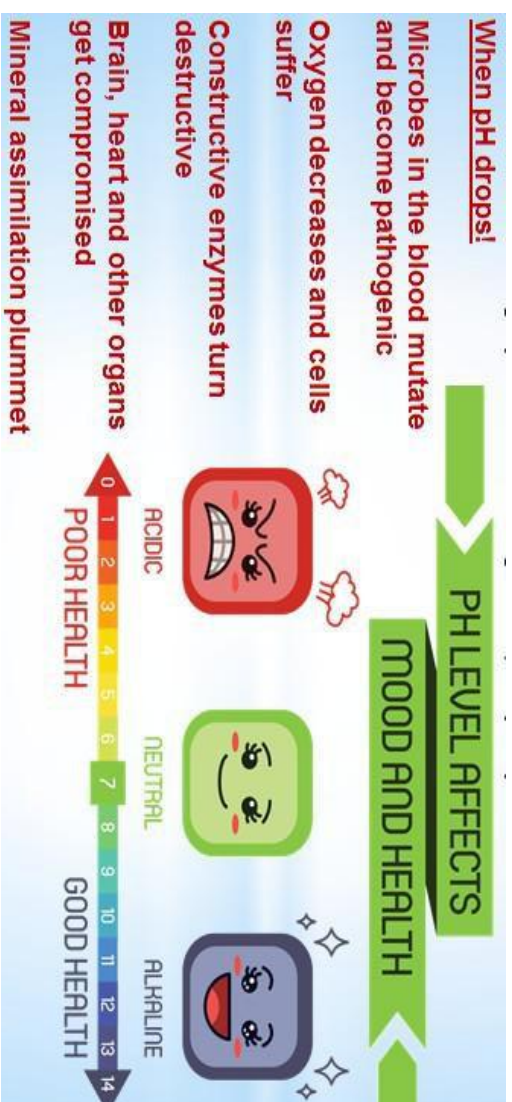

10 Qualities of ideal water!

- 1) Filtered to remove contaminants such as fluoride and chlorine
- 2) Bio Available alkaline minerals
- 3) Nano clustered (6 molecule) for complete hydration
- 4) Hexagon shape for easy cell wall penetration and hydration
- 5) Alkaline pH 9.0 to offset our acidic lifestyle and promote health
- 6) Ultra oxygenated for energy, healing and overall wellbeing
- 7) Active negative ions; antioxidant water to offset free-radical damage
- 8) Kill surface bacteria and topical infections in 30 seconds with pH 3.2
- 9) Emulsify oil such as herbicides and pesticides with pH 11.2 water
- 10) Pre-Heat the water for a cold day for Soup or a warm drink

ORP = Oxidation Reduction Potential if the value is positive it is a corrosive. If however the value is negative it is an antioxidant.

Positive Energy
-700 ORP

The Positive Energy H2O water start out purifying the water with its water filtration system, it filters particles the size of 0.01 microns or more. The water then pass the large precious metal plates forcing the separation of alkaline water from its acidic counterpart bonding positive hydrogen ions at the molecular level with H2O molecules. The process will first begin the process by breaking down the clustering of water molecules from 80 to as low as 6 Nano clusters making the water extremely hydrating and easily bondable with the human body on a Nano-cellular level. In this, its final stage, the system will restore the now living water to its original state that is much like what was found in the preindustrial age or as found today atop the Himalayan mountains. At this final stage the water will contain antioxidant properties and carry bio-available alkaline minerals. On a molecular level the water will be restructured to perfect hexagonal shapes making each drop more absorbent than tap or bottled water – combined!

DISPLAY

Know what you drink with a super large 4.2-inch LCD colorful screen, the LCD displays ORP, PH, Flow rate, Temperature and process of water

FILTRATION

The internal filter will ensure the water going into the unit will protect the unit and the drinker from exposure to excess deposits and chemicals found in every tap water.

The 9 Plates

9 Plates of surgical titanium electroplated with Platinum each measuring 9.5cm by 12.5cm = total surface area of **2,044 sq cm**

Solid metal plates with flawless smooth surface space means that the water runs through the plates evenly without the possibility of having calcium or other deposits sticking to the plates that would otherwise cause erosion and exposure to Titanium.

Flow Adapter

The flow control valve helps you regulate and control the amount of water your unit is producing.

Self-Cleaning

We wanted to further ensure that IF anything did get into the unit that it would be cleaned. This feature of this unit will wash away any particles if they did manage to find their way into your unit.

Anti-Scaling

The anti-scaling system mean that in addition to no Calcium build-up on the plates, your unit will operate in year 10 as it operated the day you first used it, ensuring quality for life!
